PRECISION WHERE IT MATTERS MOST

Grants fund science. *Operators build companies.*

Your institution invests in breakthrough research, promising cohorts, and ambitious grant programs — yet most of that potential stalls at the commercialization gap. Closing it takes embedded operators who have built companies from early-stage science and can deliver measurable outcomes across an entire portfolio.

WHY INSTITUTIONS CHOOSE US

- **Built for Institutional Scale**
We support entire portfolios, not just individual ventures. Our model scales across your cohort, pipeline, or grant portfolio with institutional-grade reporting.
- **Measurable Program Outcomes**
We structure engagements around the metrics that matter to your stakeholders — successful spinouts, capital raised, products launched, and jobs created.
- **Operators, Not Consultants**
Every team member has held the C-suite role they advise on — from regulatory submissions to commercial launches to successful exits.
- **Lab to Market, End to End**
Regulatory, reimbursement, commercial, capital strategy — every capability a spinout needs, deployed under one roof by people who have done it before.

HOW WE STRENGTHEN YOUR INNOVATION ECOSYSTEM

We partner with universities, government agencies, and accelerators to close the commercialization gap — deploying seasoned operators who turn institutional innovation into companies that reach patients and generate returns.

Portfolio Commercialization Strategy

Technology assessment, market sizing, competitive landscaping, and pathway prioritization across your entire IP portfolio — identifying the ventures with the highest commercial potential.

Spinout Formation & Launch Support

Entity structuring, licensing frameworks, founder equity design, board composition, governance setup, and operational buildout for university and government-funded spinouts.

Grant Program Design & Administration

SBIR, STTR, NIH, NSF, and DOD grant program design, milestone frameworks, award management, and portfolio-level outcome tracking for institutional funders.

Regulatory & Clinical Strategy

510(k), De Novo, PMA, and Breakthrough Device pathway guidance for portfolio companies. Pre-submission strategy and end-to-end clinical trial design.

Accelerator & Incubator Program Design

Curriculum design, cohort mentorship, milestone-based programming, demo day preparation, and venture development infrastructure for institutional programs.

Investor Readiness & Capital Formation

Portfolio-wide pitch preparation, financial modeling, data room creation, investor introductions, and phased capital strategy for institutional spinouts.

Fractional C-Suite for Portfolio Companies

Deploy experienced executives across your portfolio — CEO, CFO, CCO, Regulatory — at fractional cost with institutional accountability and reporting.

Public-Private Partnership Development

Government contracting frameworks, interagency collaboration, public-private partnership structuring, economic impact reporting, and policy-aligned commercialization strategy.

THE PROOF

Our operators have collectively supported hundreds of launches, raised billions in capital, and driven 50+ successful exits — partnering with universities, government programs, and accelerators to transform institutional innovation into companies that reach patients and generate lasting returns.

Stronger programs. More successful ventures.

Let's turn your pipeline into companies.
